We reply, 1st. That if the Marshal is performing the duties above suggested, there is no use for a Captain of Police. That office should be abolished by the Council, and the \$2,000 If the Captain of Police is doing the Marshal's duties, or most of them, the latter should no draw as much pay as the former. The city can't afford to pay two officers, full salaries, for doing one officer's work. It makes no difference whether the Marshal is second or tenth in com-mand, as regards the pay,—that should be regu-lated by the amount of services performed. extra duties. When, therefore, those fees are taken away the extra duties are also abolished, takon away the extra duties are also abolished, and then the Marshal has nothing to do, save the duties for which a compensation of \$700 was considered am, c. CRICKET MATCH—QUEEN'S BENTHDAY.—We rode out yesterday to the Cricket ground, to see the sport. The Chicago Chab was the match, as will be seen by the report. The weather was fine for the occasion, and the crowd esemed to be sharp set for fun. The grounds were visited by a large number of young ladien from Gould's riding gallery, who come on borsehack. Every thing passed off in fine style. The "chicken fixens," in Cutmore's booth, seemed to give general satisfaction to the ladies and gentlemen who partook of the refreshments. Muncantile Execution.—It is a pleasure to know that a sound and fiberal mercantile education is now within the reach of every young man of ordinary means and abilities, and to this desirable result no one has contributed more than Mesers Present and United to Bryant and Stratton. The chain of colleges estab-lished by their enterprise, and now under the direc-tion of these gentlemen, located at Albany, Buffalo, Cleveland and Chicago, has been the means of dif-fusing through these communities and the locations adjacent, practical and scientific views of business. The reputation of these colleges extends throughout the East. Young men are daily becoming more impressed with the necessity for mercantile edinos-tion to secure success in business, and they will not let the sdvantages so easily secured escape them.

Amid the many instances of this we will only mention the important fact, which German music played in the great Reformation. and the many instances of this we will only mention the important fact, which German music played in the great Reformation. Had Luther not been a musician as well as hero, one might well fear that Protestantism had not triumphed. But he set to noble strains the deep impulses of the people; he made poetry and songs through which they poured firth their wrongs and sorrows, their hopes and fears; he composed lofty melodies breathing heroic valour or Christian resignation; and well-known hymns inspiring Faith, and Hepse and Love. It may be said of times as it was of his words, that they were half-battles. His hymns and music contributed much to the triumph of Protestantism; and indeed one can believe that a people could not easily be overcome who went into conflict to the melody of such songs as the one known so well as Luther's Hymn. or readers are aware that the terms of that eaty made the United States, a party to a recement long ex sting between Great Britain d Honduras, in which the latter stipulates to

We may then, with good reason welcome this German Song Festival, for to Germans and German music, we are largely indebted. And it may also well be a subject for comprehistion, that while we Americans are so stworted in selfish and business cares, with but little music either in our saids or in our lives, we have in our nidst a people who cherish, and

CHERING PROSPECTS FOR THE POPULATION OF FRANCE.

An amusing circumstance which occurred the other day at a concert given in the Salle-Ceelle for the benefit of the Gephan Institution of Igny, coupled with the crowds of Joyous children which through the Tulleries Gardens and the Palais Royal, would shake use's bellef in the asserted decline of the population, were that fact not lassed on efficial signes. At the above concert Mesdames Viardot and Caroline Duprez were the principal wocalists, and Madane Rose Cherri performed with M. Depuis in a slight "proverbe." The proceedings went of most successfully, and a lady patroness, suppraching Mediane Rose Cherri, beginned to the step around the concert room and make a collection in favor of the institution. Madame Rose Cherri, with much embarrasement, replied that her position was of so very interesting a mature that she dared not renture into a crowd. The lady patroness miled, and invited Madame Caroline Duprez, or rather Madame Vanden Hemel-for such is the harmonious name of her husband—to make the collection. But Madame Duppez blushed, and confessed that her position was so very similar to that of Madame Rose Chert, that she must bey to decline. "Then the lat must fall to year Madame Viardot," exclaimed the lady patroness. Madame Viardot sighed and responded, "Alas, I am like those Indies!" The lady patroness in despair handed the plate to M. Dupuis, who having nor reasonable obsertion to offer made a collection which will bring joy to the poor orphans of Igny.

ered the mode for the parehase at Cuba. In a few days we shall know who is to have charge, for the coming four years, of this important negotiation in Spain. Some suppose it will be Mr. Pickers, of south Carolina. I do not think it will be Mr. Belmont, though Ouba gan never be purphased, except through the inancial influence of the Rothchilds and other moneyprinces of Europe. No changes are to be made in the mission to England and France at present. But, ultimately, as soon as anything is to be done, Mr. M. J. Walker will be our representative it England and Mr. Silicall in France. If Caba is to be bought by the Administration, it must be through reparably skillful diplomacy in London and Paris.

It is a matter as to which England and France will have something to say. Their consent and influence must be obtained as a necessary preliminary to a successful altempt to purchase Ouba from England. About one hundred and fifty or two hundred millions is all that the United States will consent to pay, or be bound for. They do not expect to pay it from the Treasury of the United States, But, the Cupin Oreole planters and staveholders will promise to pay the money, as well they might, considering that by the money as well they might, considering that by the money as well they might, considering that by the money as well they might, considering that by the money as well they might in the raths of their property, they will make about the elever wim of seven hundred and fifty millions.

New York, May 20, 1857.

The Directors of the Michigan Southern and Northern Indiana Railroad Company present herewith a statement of the applications made for the \$3,000,000 of its 10 per cent. guaranteed stock, and of the manner in which the This subscription was opened on the 7th of the present month, and at the close of the books this day it reached the sure of \$6,645,088, embracing 902 different subscriptions. the present month, and at the close of the books this day it reached the sum of \$8,645,085, embracing 902 different subscriptions. The subscribers represent, in the aggregate, about \$7,000,000 of the general stock of the Company, standing in their names on the books. In compliance with the terms of the original proposition, there has been awarded to each subscriber four shares of the guaranteed stock for every ten shares of the guaranteed stock for every ten shares of the guaranteed stock for or loss amount; and these several awards appear in the list herewith.

In announcing this result, the Directors express their gratification at the prompt and liberal manner in which the stockholders have responded to their appeal. They have thus been enabled to realize, without sacrifice, oash means to an amount sufficient to place the finances of the Company in a satisfactory condition. They consider the unsold assets and securities of the Company sufficient to provide for the remainder of its unfunded debt, and that they may be converted as fast as may be necessary for that purpose.

The entire system of roads of this Company, embracing the Gosben Line just opened, and the Detroit Road and Jackson Branch, now nearly finished, will be in operation in July; and the Board deem this a proper occasion to renew the expression of their confident opinion that the earnings of the Company for the future, as for the past, will be sufficient to provide for interest upon its debt, to meet the annual contributions to the sinking fund, and to make to the stockholders regular and tiberal dividends upon both classes of the stock. This result is indeed insured by the past carnings of the road, allowing 60 per cent, for expenses, at which it is confidently believed the road may be operated. The new portion of our road, now about to be opened, will, in the opinion of the Board, add largely to our reseptie; and it is believed that \$3,000,000 per annum will be the mainium of the earnings for the first. would seem as if the locality of the wound is such as almost to render hopeless any attempt to save him from death—a death toward which he may journey in the full possession of all his faculties and agonizingly comeious of its ap-proach, and that death one of the most horri-bic known to human experience. that his dog was bitten by another about eight or nine days ago, but he had apprehended no serious consequences. Should hydrophobis have its course on him, the warning will probably be taken by many municipalities, and thousands of vagrant, homeless dogs fall victims to the belief some people persists in entertaining that the life of one human being is priceless in the comparison with those of a universe of brute beasts.

An Editorial Change. Thomas Darry Magoe, Ev., the brillians and zealous editor of the American Got, has left that paper and accepted the effective of the American Got, has left that paper and accepted the efficiency of the American Got, has left that paper and accepted the evitorship of a new secular journal to be published in Montreal. In his closing address he reviews at considerable length his past political carreer, confessing his mistakes with frankness and showing an evident determination to profit by experience. While he ardently sympathized with the cause and claims of Ireland, he now regards the firsh rebellion of 1848 as a musterpiece of absurdity, and only wishes he had been able to see it in the same light eight years ago. This country, he says, is not the place for frish Catholics which they fondly thought it was, and hence his carnest desire that as many as possible of his countrymen who are now living in the Eastern States should make new homes and a new society for themselves in the West.
